How to assemble

3-shelf bookcase

Rather see it in 3D and hear each step?

Point your phone camera at the code. The manual opens on your phone, shows each step in 3D and reads it aloud.

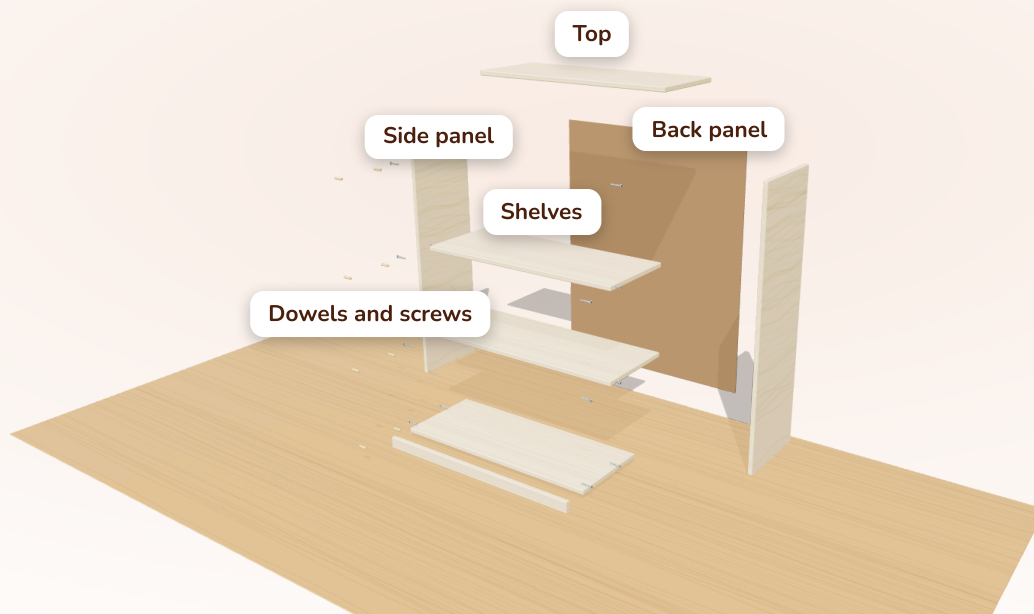

1

Check the parts

Open the box on a blanket or a piece of cardboard. Lay out the parts and check that nothing is missing.

Scan to hear this step

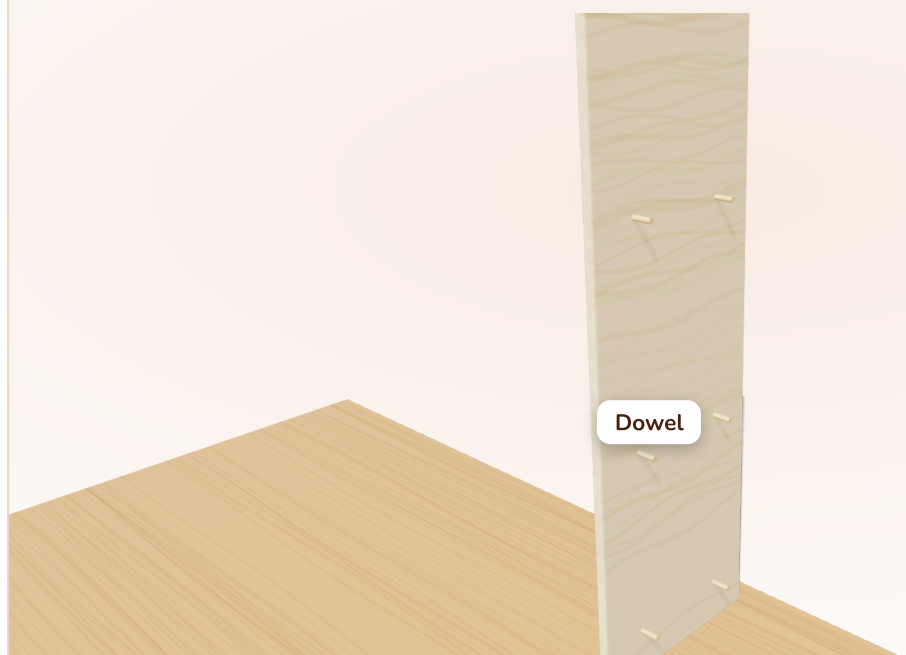

2

Insert the dowels

Push the wooden dowels into the holes of the side panel. Tap them gently, by hand or with a rubber mallet.

Scan to hear this step

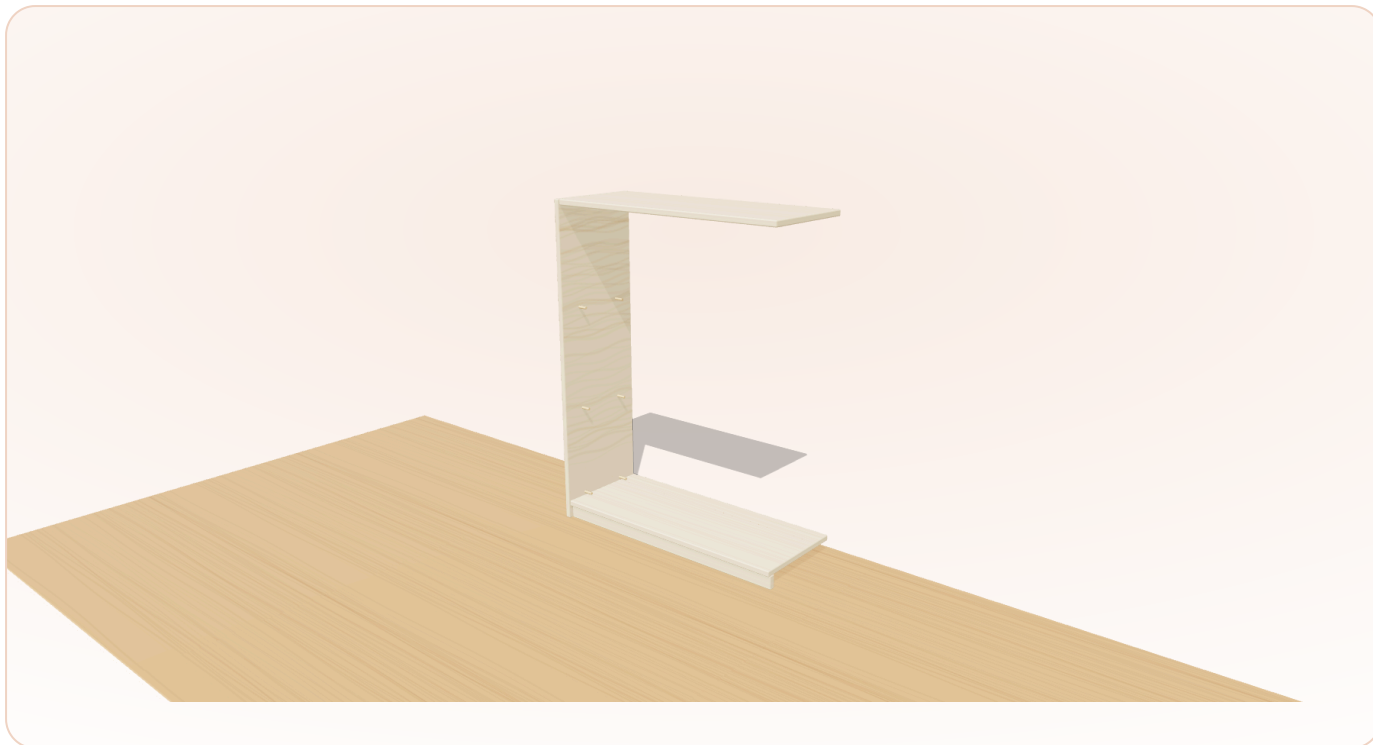

3

Fit the base and the top

Fit the base and the top onto the dowels of the side panel. The smooth edges face the front.

Scan to hear this step

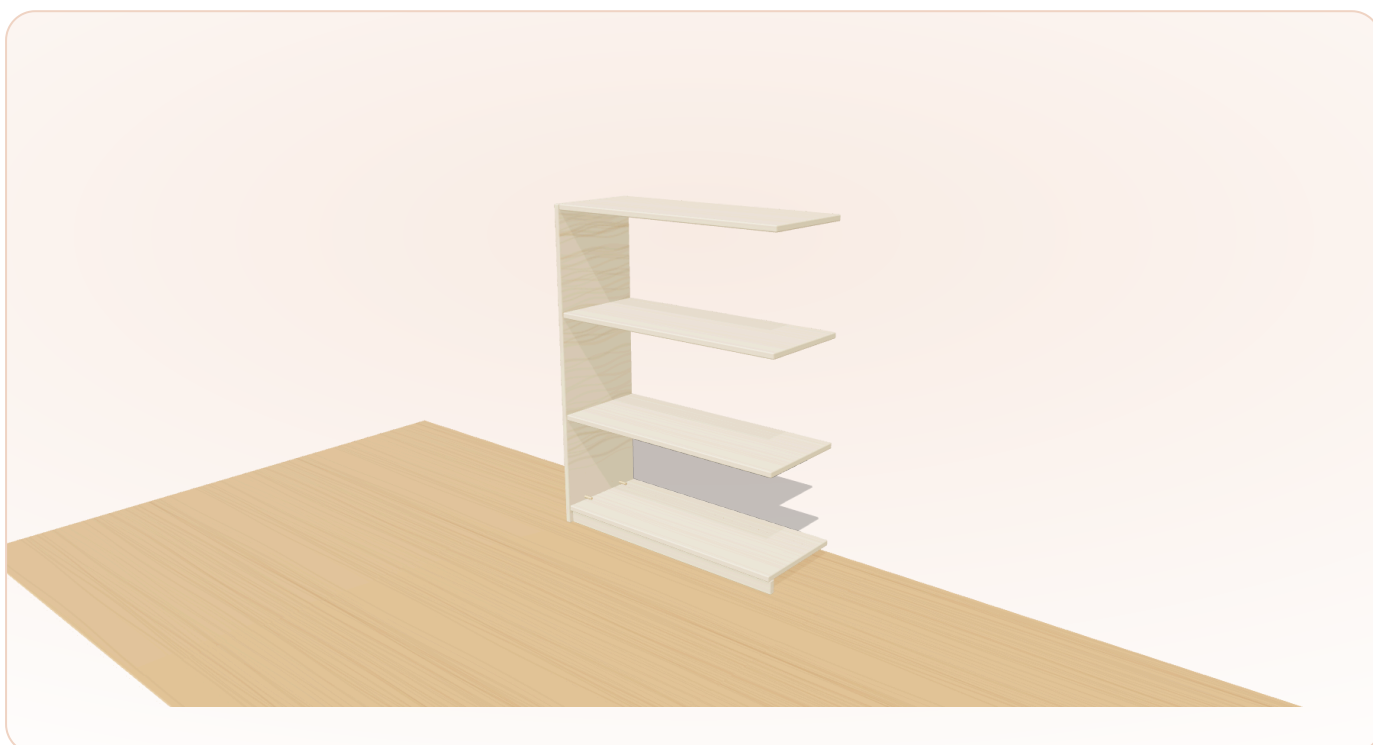

4

Fit the shelves

Fit the shelves onto the middle dowels. Check that they sit straight.

Scan to hear this step

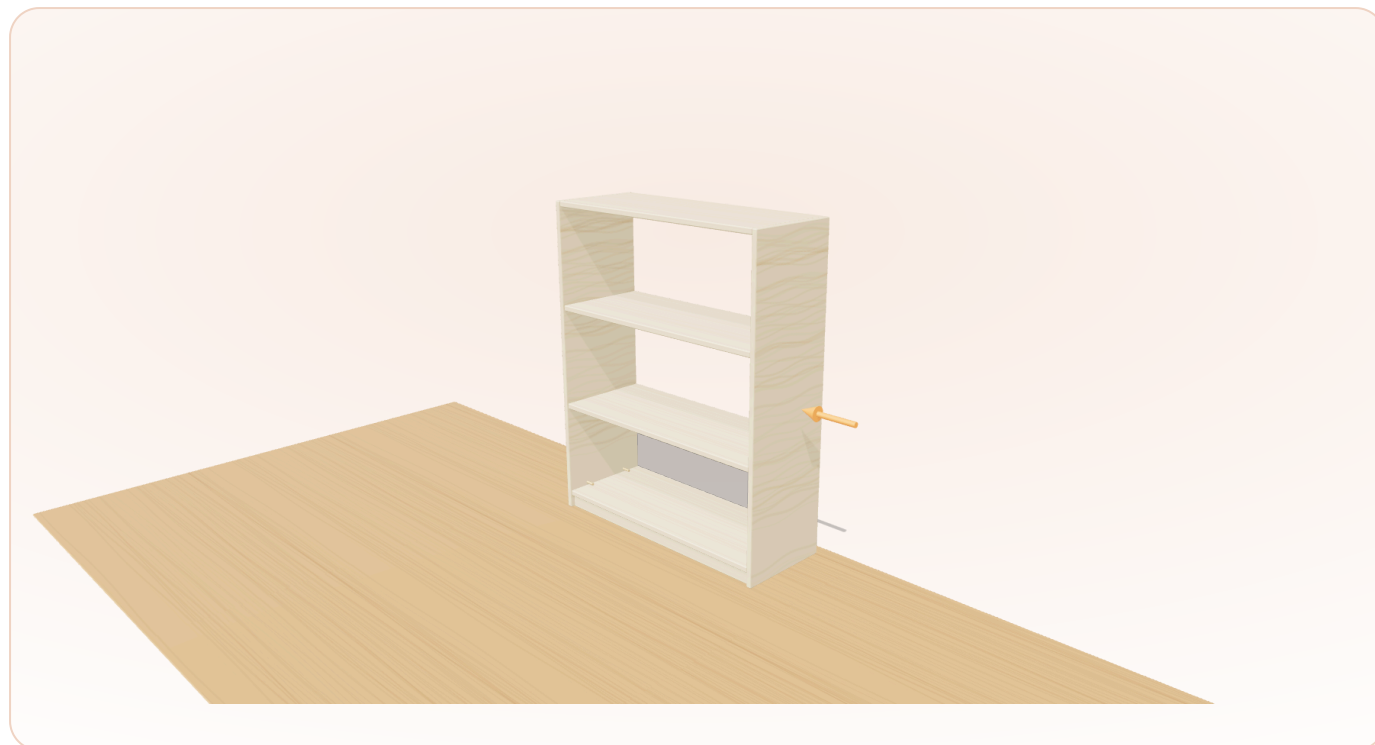

5

Close with the other side

Fit the other side panel over the dowels. Push until it touches every part.

Scan to hear this step

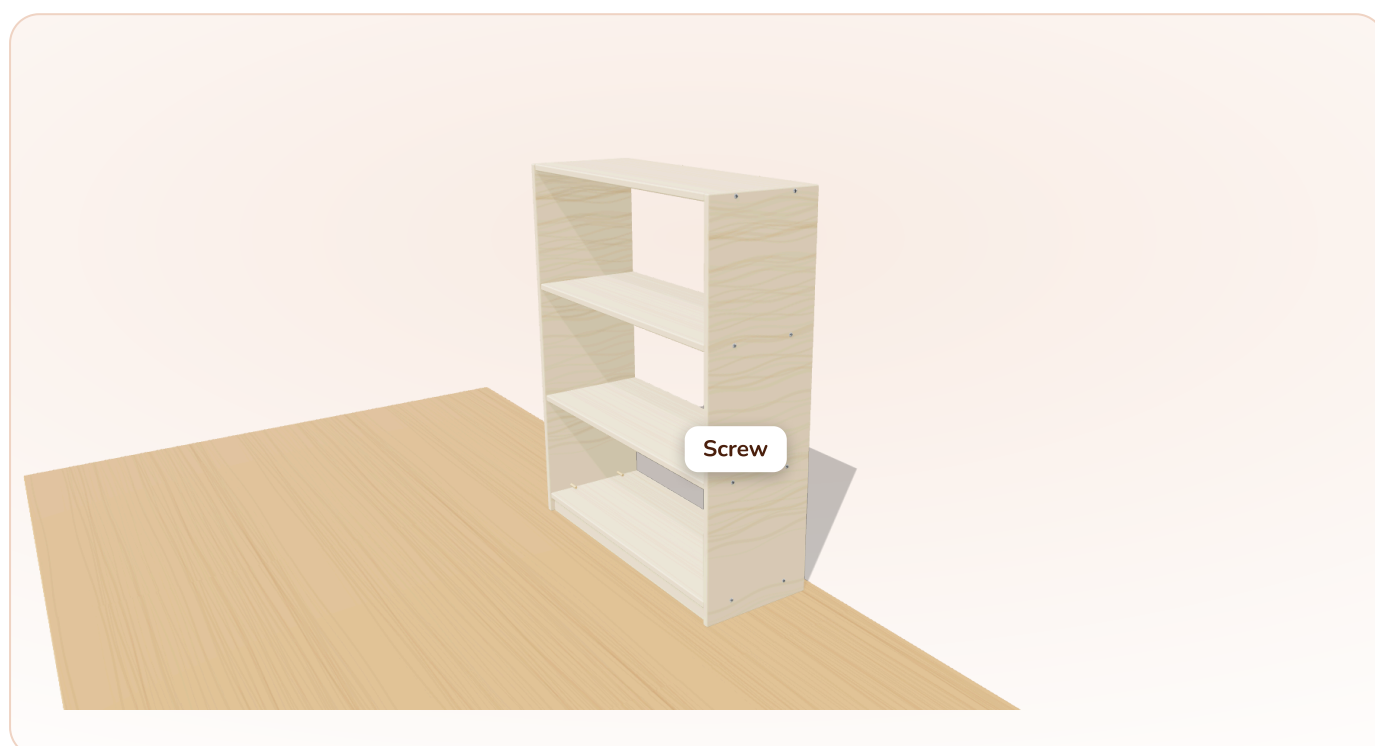

6

Tighten the screws

Tighten the screws with the key from the box. Make them firm, but not too tight, or the wood will strip.

Scan to hear this step

7

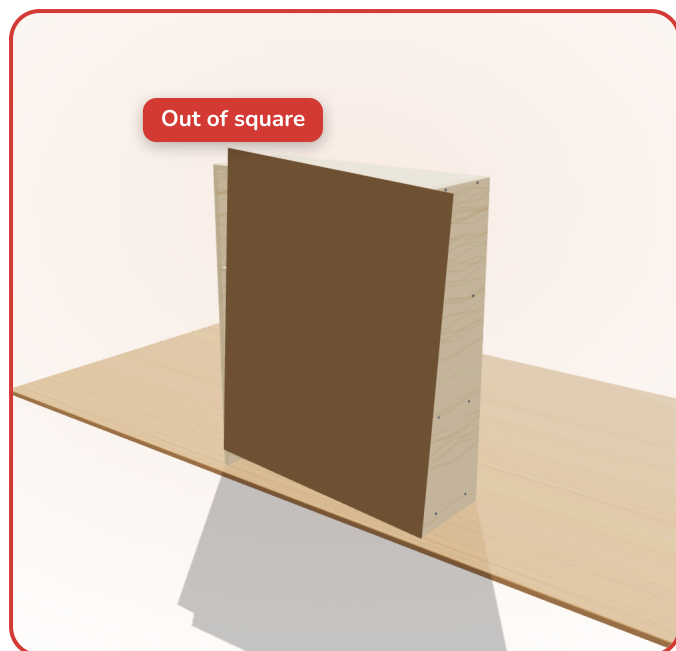

Nail the back panel square

Before you nail the back panel, measure both diagonals. The two must be equal. Then nail the panel all around.

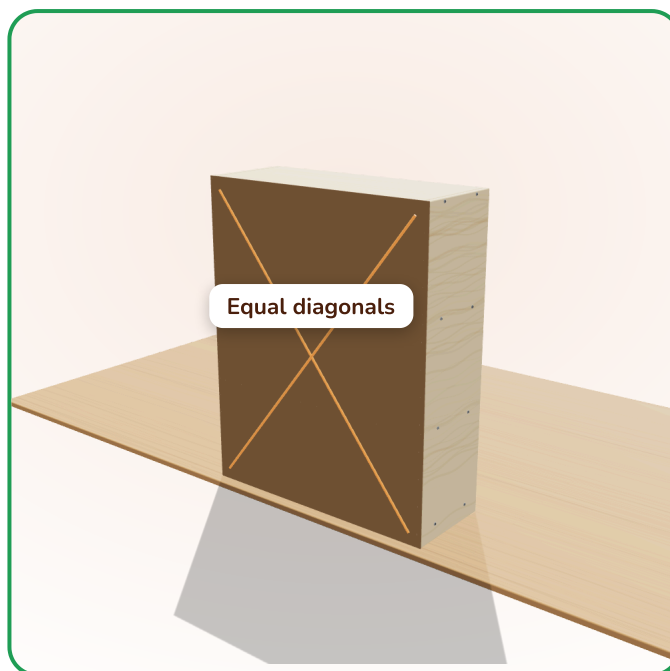

Scan to hear this step

✗ Not like this: a crooked back panel leaves the unit crooked and wobbly.

8

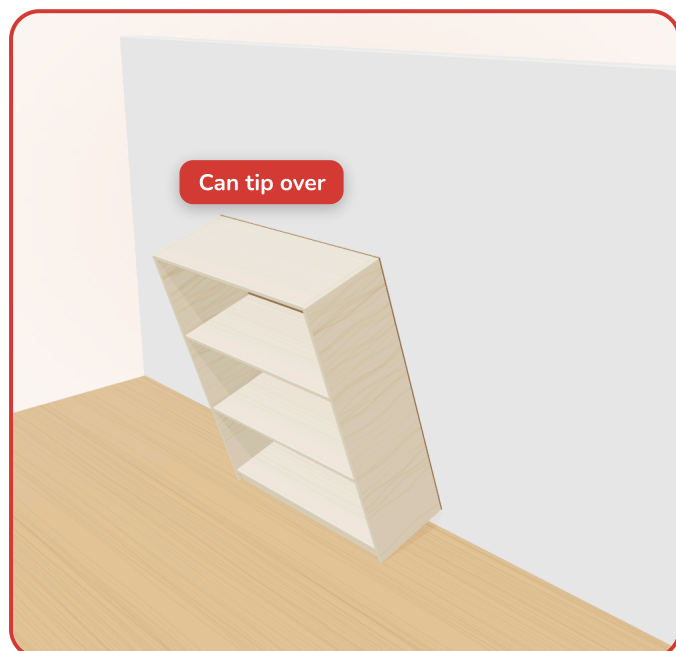

Fix it to the wall

Push the unit against the wall and fix it with the bracket from the box. This way it cannot tip over onto anyone.

Scan to hear this step

✗ Not like this: a loose unit can tip over, above all when a child climbs it.
